About Me

Computer Science student with a strong interest in backend development. Experienced in building REST APIs, authentication systems, and real-time applications using Node.js, Express, and MySQL. Enjoys understanding how systems work end-to-end and writing clean, maintainable code.

Experience

Backend Development Intern

ExpertsCloud

- Worked on backend development using Node.js and Express.
- Built and tested REST APIs for authentication and data handling.
- Worked with MySQL databases and managed relationships.
- Used Postman to test APIs and debug backend issues.

Projects

Notes Sharing Platform

Node.js, Express, MySQL, JWT

- Built a backend for a notes sharing platform with authentication.
- Implemented JWT-based login with token expiration.
- Added features like likes, profiles, and followers.

Real-Time Messaging Tool

Node.js, WebSockets (ws), JWT

- Built one-to-one real-time messaging similar to WhatsApp.
- Used WebSockets for instant message delivery.

Education

FAST National University

Bachelor of Science in Computer Science

Currently in 6th Semester

Skills

- **Languages:** JavaScript, C, C++, Python, SQL
- **Backend:** Node.js, Express.js
- **Databases:** MySQL
- **Real-Time:** WebSockets
- **Tools:** Git, GitHub, Postman
